Summary

I am a backend web developer working on Laravel, PHP, MySQL, and Ajax for over two years. I am developing web applications using Laravel, testing, deploying, and maintaining web applications in production environments, maintaining, and optimizing web application performance, troubleshooting technical issues, etc.

During my web development process, I mostly have to use PHP, OOP, Laravel, HTML, CSS, JavaScript, database management using MySQL, Version Control system, IDE, and database editor, and Integrate third-party API and payment gateways.

In my whole web development career, I have worked on e-commerce, real estate portal, courier management system, multivendor e-commerce, POS,
